PR #63 independent numerical review
Method-level checks; no molecular-spectrum or sampling-convergence claim
A. Nonharmonic thermal potential
Primitive (order 1.994)
SC (order 3.989)
Absolute error versus Schrödinger reference
Number of beads, P
B. Finite imaginary-time discretization
PIGS at projection T=8
Second-order guide
Error versus exact finite projection
Imaginary-time interval, tau
C. Two distinct PIGS error sources
Finite projection error
Finite tau error (tau=0.03125)
Absolute potential error
Total projection duration, T
D. Harmonic centroid dynamics
Coupled 6D PA-CMD centroid
Second-order guide
Maximum error at t=5
Real-time step, dt
